COMPANY PROFILE

KRIDHA[®]
PLYWOOD | LAMINATES

We serve our customers with
excellence and superior quality
of products and a committed service

ABOUT US

KRIDHA is India's leading manufacturer of plywood and laminate products. Contributing to the interior lifestyle industry for many years by manufacturing high-quality and exquisitely aesthetic ply and laminate, KRIDHA serves a broader range of clients across the world. We have nationwide sales network along with dedicated channel partners in major cities and sales team force operating Pan India.

We, at KRIDHA, work with a vision to provide best services in the industry of plywood and laminates.

Our products cover a versatile range from shuttering ply, commercial and marine grade plywood, decorative plywood, Calibrated plywood, 0.8mm laminate to 1mm laminate, door skin, flush door and blockboard catering to the diverse needs of our customers.

Our products are not only borer and termite resistant but are also designed in attractive shades and colours that give an artistic look to your home.

Pioneer architects and interior designers across the country prefer KRIDHA products.

KRIDHA is backed by experienced and highly-skilled professionals. Our commitment to offer excellence in customer's service & satisfaction remains steadfast.

KRIDHA[®]
PLYWOOD | LAMINATES

“ Ajinkya Rahane may be one of the top test batsman in the world today, but it was not so easy for Ajinkya to achieve this success. Today Ajinkya has everything but there was a time when Ajinkya had to walk six kilometres for practice with his mother because his family did not have the money to afford rickshaw even in a week. Despite of all difficulties, Ajinkya Rahane was determined to be a successful batsman. The Mumbai star debuted for India in 2011 during the tour of England and has not looked back since then. Rahane has scored Test centuries in New Zealand, England and Australia and he is known to bat in every difficult situation. He started his international career as a white-ball specialist before breaking into the Test side.

INFRASTRUCTURE

Our commitment to our work and the industry is displayed by the range of designs in the products we offer. Our production capacity is mammoth sized in the industry with our team producing about 2.6 lakh Laminates per month and a huge supply of plywood products per month. We have created a huge production space of 32 acres with 4 big units which work on paper based sheets to create products with a superior finish.

KRIDHA

Our plywood products are a work of hard work and expertise blend together with years of experience in the industry

ABOUT PLANT

We are pioneers in creating a beautiful range of Plywood and Laminates. We have created a plethora of designs of different product types like Plywood (BSL), Flush Doors (BSL), Board, Calibrated Plywood, Shuttering Plywood, Laminates with 1MM and 0.8MM dimensions and a wide range of Door Skin. To ensure maximum satisfaction of our customer we offer different product sizes, finishes and thickness. We have created Laminates of 8x4 dimension in different types of textures like Glossy, SF and Matte. Our Plywood products range from 8x4 to 7x4 to 6x4 to 8x3 to 7x3 and 6x3. We offer two distinct and beautiful finish of Natural and Varnish types. Our door products have thicknesses of 1MM and 0.8MM with different sizes and shuttering of 30 and 34 Kgs.

SUPERIOR
LOOK

4 TIMES MORE STRONGER PLYWOOD PRODUCT RANGE

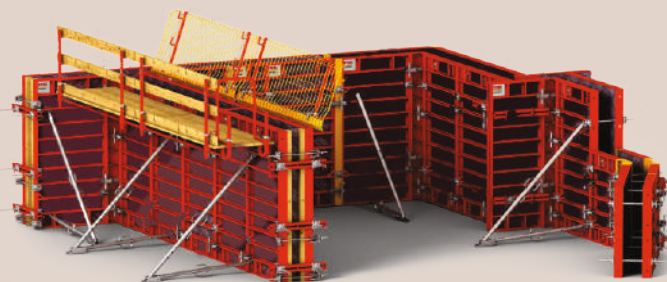

MIRROR & HIGH GLOSS SURFACE FINISH

- High GSM Film Enhances surface finish & abrasion resistance.
- More reuses/ repetitions reduces overall cost of construction.
- Balanced construction provides high static bending strength.
- Dimensionally stable & structurally strong.
- Less water absorption due to excellent sealing.
- Bigger size availability reduces labour cost, saves time & smooth finish.
- Plywood confirms to IS : 4990.

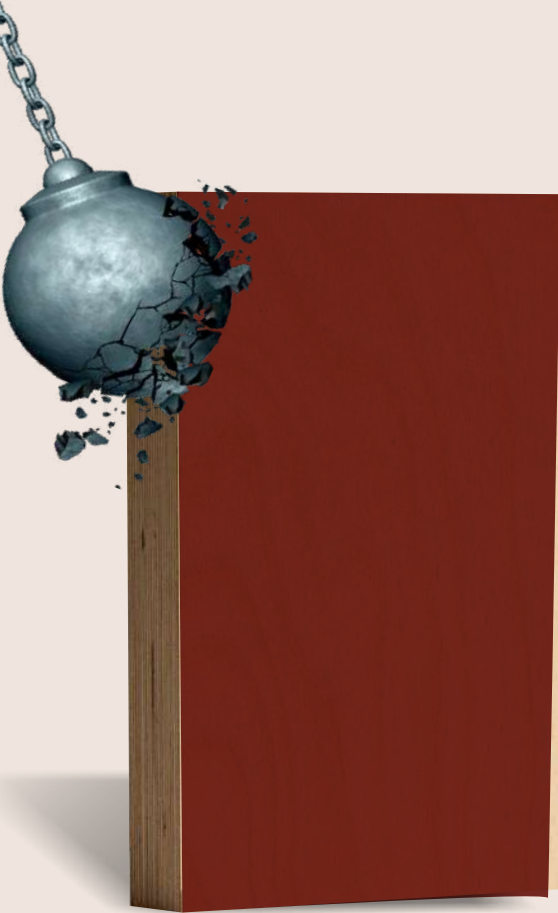

SHUTTERING PLYWOOD

Kridha Shuttering Plywood is specially designed for concrete work, shuttering applications. It's a long lasting reusable product.

- 100% Boiling Water Proof
- Higher GSM Phenolic film
- Mirror & High Gloss Surface Finish
- Low Swelling
- High Density
- Excellent Nail/Screw Holding Capacity
- Uniform Thickness
- Maximum Repetitions Guaranteed
- *20times** REPETITION

We employ advanced European machinery and technology to making sure we perform 100% calibration and provide plywood with 100% hard wood with a superior finish. We follow a very carefully designed production process to ensure higher quality of our plywood which is calibrated on both the sides.
